NON-INTERCHANGEABLE DRUG PRODUCTS

The following is an incomplete, partial listing of legend multiple-source drug products that are NOT listed in the current edition of the Illinois Formulary for the Drug Product Selection Program. Illinois pharmacists may not interchange prescriptions written for these brand-name drug products, even if the prescriber has checked the "MAY SUBSTITUTE" box on the prescription form, without first obtaining a new prescription from the prescriber. This does not apply to "Authorized Generics" (see page x of the 19th Edition of the Illinois Formulary) whereby a pharmaceutical labeler manufactures and markets their own brand name product under a generic label.
