4. **METHOD OF FINANCING:** The source of funds required to undertake the project or capital expenditure. Forms of financing include equity (cash and securities), lease, mortgages, general obligation bonds, revenue bonds, appropriations and gifts/donations/bequests.
5. **OBLIGATION:** The commitment of funds directly or indirectly through the execution of construction or other contracts, purchase order, lease agreements of other means for any construction or modification project.

NOTE: Funds obligated in a given year should not be carried forward to subsequent years due to phased or periodic payouts. For example, a facility signs a \$2 million contract in 2011 for construction of a new bed wing. Construction takes approximately three years with payments being made to the contractor during 2011, 2012 and 2013. The entire \$2 million would be listed once as an obligation for 2011 and would not be listed in subsequent years.

6. **PROJECT:** Any proposed construction or modification of a health care facility or any proposed acquisition of equipment undertaken by or on behalf of a health care facility regardless of whether or not the transaction required a certificate of need. Components of construction or modification, which are interdependent, must be grouped together for reporting purposes. Interdependence occurs when components of construction or modification are architecturally and/or programmatically interrelated to the extent that undertaking one of more of the components compels the other components to be undertaken. If components of construction or modification are undertaken by means of a single construction contract, those components must be grouped together. Projects involving acquisition of equipment, which are linked with construction for the provision

of a service cannot be segmented. When a project or any component of a project is to be accomplished by lease, donation, gift or any other means, the fair market value or dollar value, which would have been required for purchase, construction or acquisition, is considered a capital expenditure.

7. **NET REVENUE:** Net Revenue is the result of gross revenue less provision for contractual adjustments from third party payors (Source: AICPA).
