RECERTIFICATION SEMINAR BULLETIN

2012

The following have been approved for recertification credit under the Illinois Structural Pest Control Act. If you have a technician certificate, which expires 12-31-2012, and you have not accumulated nine hours of continuing education credits, you must acquire the hours prior to renewing. Continuing education credits may be accrued in increments of three hours or more. Attendance at a seminar DOES NOT automatically renew your certification; it merely makes you eligible to renew when you receive your renewal application from the Department in October of the year of expiration. You may check the website below for updated bulletins. If you wish to receive bulletins produced during the year by mail, you must submit a self-addressed, stamped envelope to the Department at the above address. *An updated version of this bulletin may be viewed at <http://www.idph.state.il.us/envhealth/pdf/Bulletin.pdf>.* **To register for a seminar, you must contact the appropriate seminar sponsor.**
