This symposium is designed for physicians, nurses, allied health personnel, state and local health department staff and other individuals involved in public health and medicine. It will provide attendees with an outline of emerging public health issues that will affect the health care delivery system, with an emphasis on the important relationships between medicine and public health.

Learning Objectives
At the conclusion of this course, the participant should be able to complete the following:

• Describe the progress of Illinois public health over the last 125 years and describe the Department’s role.
• Define the scope of health inequality and discuss promising directions toward the elimination of racial and ethnic health disparities.
• Identify cultural, organizational and financial factors that affect minority health care delivery and compliance.
• Identify information management strategies and technology for public health professionals that will promote more effective use of information.
• Describe public health informatics and its evolution, current applications and research issues.
• Identify changes in public health since 1988 and describe social determinants of health for the 21st century.
• Discuss Institute of Medicine recommendations on assuring health in the 21st century.
• Discuss critical elements for a modern public health network including greater commitment to leadership and communication, disease and environmental tracking, and capacity to take action.
• Explain the role of public health agencies in responding to biological/chemical attacks.
• Better describe and classify biological and chemical agents.
• Examine why advances in biology and the spread of germ weapon expertise to such countries as Iran, Iraq and North Korea could make germs the ultimate weapon of the 21st century.

Accreditation
This activity has been planned and implemented in accordance with the essential areas and Policies of the Illinois State Medical Society (ISMS) through the joint sponsorship of ISMS and the Illinois Department of Public Health. The Illinois State Medical Society is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

Credit
The Illinois State Medical Society designates this continuing medical education activity for a maximum of 6.75 hours in category 1 credit towards the Physician’s Recognition Award of the American Medical Association. Each physician should claim only those hours that he/she actually spent in the education activity.
2002 Public Health Milestones and Future Challenges

July 9-10, 2002
Holiday Inn City Centre
Chicago, Illinois

This symposium is designed for physicians, nurses, allied health personnel, state and local health department staff and other individuals involved in public health and medicine. It will provide attendees with an outline of emerging public health issues that will affect the health care delivery system, with an emphasis on the important relationships between medicine and public health.
