Figure 6	Percent of Population Hispanic or Latino Ethnicity by County in Illinois: April 1, 2000 .....	32

## APPENDIX TABLES

Appendix A	Population by Selected Age Groups for Illinois Counties: April 1, 2000 .....	35
Appendix B	Illinois Cities of 1,000 or More Population: April 1, 2000 .....	38
Appendix C	Group Quarters Population by Type for Illinois Counties: April 1, 2000 .....	49
Appendix D	Glossary .....	53

## INTRODUCTION

This report provides April 1, 2000 population counts for Illinois, counties and incorporated places, as well as some comparison data from earlier censuses. It also presents data on race and ethnicity, components of growth, historical population trends for the state and its counties. Census 2000 data for this report are from Summary File 1 and were downloaded from the Census Bureau's American FactFinder Web site. Additional information on census 2000 can be obtained from the American FactFinder ([WWW.CENSUS.GOV](http://WWW.CENSUS.GOV)) or by contacting the Illinois Center for Health Statistics at 217-785-1064.

All census figures are for April 1 of the year cited. Please visit the Illinois Department of Public Health's Web site at [WWW.IDPH.STATE.IL.US](http://WWW.IDPH.STATE.IL.US) for additional information on population for Illinois and its counties.

## Recent Trends

### State

The population of Illinois more than doubled from 4.8 million people in 1900 to 12.4 million in 2000. Illinois ranked as the third most populous state in 1900 and fifth in 2000. Population growth for the state was highest between 1950 and 1960 (1,368,982) and lowest between 1980 and 1990 (4,084). Between 1950 and 2000, Illinois gained population through natural increase for every decade, but through both natural increase and net migration only for the 1950-1960 and 1990-2000 periods (Table 1).

Table 1  
Components of Population Change in Illinois: 1950-2000

Year	Population	Period	Total Change	Natural* Increase	Net* Migration
1950	8,712,176	-	-	-	-
1960	10,081,158	1950-1960	1,368,982	1,216,906	152,076
1970	11,113,976	1960-1970	1,032,818	1,069,965	-37,147
1980	11,426,518	1970-1980	312,542	728,002	-415,460
1990	11,430,602	1980-1990	4,084	807,055	-802,971
2000	12,419,293	1990-2000	988,691	820,321	168,370

### Age, Sex and Race Counts - Illinois, Chicago and Downstate

In 2000, 72.8 percent of the state's population were white alone and 27.2 percent were other races (see page 24 for an explanation of the 2000 census race and ethnicity categories). In Illinois, 13.3 percent of the white alone population and 8.9 percent of the all other races population were 65 years of age and older (Table 2).

The populations of substate areas, such as Chicago and downstate (Illinois minus Chicago), had different age, sex and race characteristics in 2000 (Tables 3 and 4). For example, the proportion of the population younger than 10 years of age was 15.3 percent for Chicago and 14.3 percent for downstate. In 2000, persons 35 to 64 years of age (the established workers) accounted for 33.9 percent of Chicago's population and 38.5 percent of the downstate population.

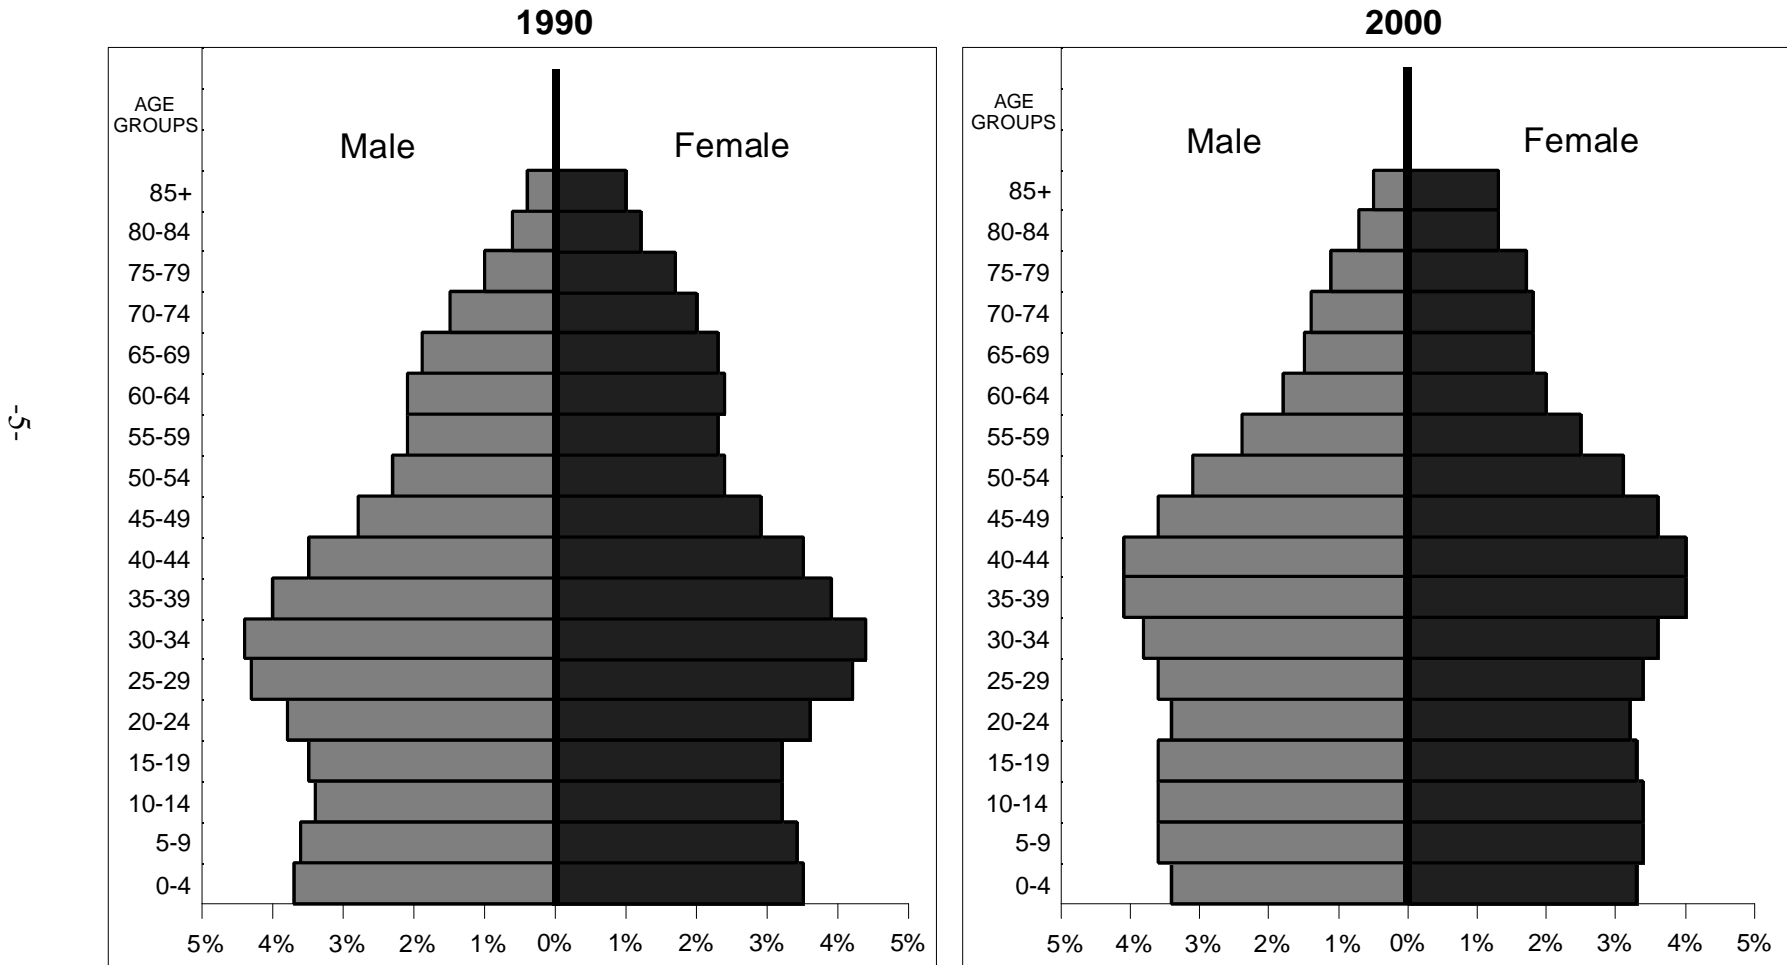

In 2000, Chicago's population was 42.0 percent white alone and 58.0 percent all other races; the downstate population was 82.1 percent white alone and 17.9 percent all other races.

\*Other races = Total - White alone  
Source: U.S. Census Bureau

About 29.3 percent of white alone and 43.3 percent of all other races in Chicago were younger than 25 years of age in 2000; for downstate, the proportions were 33.6 percent and 43.9 percent, respectively. In Chicago, 13.4 percent of the white alone population and 8.1 percent of the all other races population were 65 years of age and older; for downstate, the proportions were 13.2 percent and 9.8 percent, respectively.

Changes in Illinois' age structure can be illustrated with population pyramids (Figures 1, 2 and 3). The population pyramid for Illinois had a broad, expanding base in 1990 compared to 2000 base. The people who were then 50 to 59 years of age represent the relatively smaller birth cohorts born during the 1930s and the Great Depression. Farther up the pyramid, the people 60 to 85 and older comprise the larger birth cohorts born after the turn of the century and immigrants who arrived in this country during the first three decades of this century. For the subsequent decade, the 2000 population pyramids show the aging of these cohorts. In 2000, the pyramid had a contracting base (smaller proportion in 0-4 age group relative to the baby boomers of any age group) and the baby boom cohorts were becoming somewhat less conspicuous. For age group 65 and older, white proportions (for more details on modification of race categories, see page 33) were greater than other races but for under age 30, proportions for all other races were greater than whites.

### Counties and Metropolitan Statistical Areas

Sixty-eight of Illinois' 102 counties gained population from 1990 to 2000 (Table 5). The population of the state grew 8.6 percent, due primarily to growth in seven large counties (Cook, DuPage, Kane, Lake, McHenry, Will and Winnebago). These seven counties collectively accounted for 86.6 percent of Illinois' population increase during this period. Of the 68 counties that gained population from 1990 to 2000, 37 had increases of less than 5.0 percent. The five largest percentage gainers were McHenry (41.9%), Will (40.6%), Kendall (38.4%), Boone (35.6%) and Kane (27.3%). The five counties with the largest percentage declines were Alexander (-9.7%), Hardin (-7.5%), White (-7.0%), Gallatin (-6.7%) and McDonough (-6.6%).

Source: U.S. Census Bureau

From 1990 to 2000, 38 counties had more deaths than births (natural decrease) and 39 counties experienced net outmigration (Table 6). Thirteen of these counties lost population through both components of population change (natural decrease and net outmigration). Ten of these 13 counties have small populations (less than 20,000). Cook County had the largest numerical loss through net outmigration (-158,315) and Will County had the largest gain through net immigration (104,805).

The median age is the value at which 50 percent of the population are younger than that age and 50 percent of the population are older than that age. Gallatin (39.2 years), Hamilton (39.1 years), Calhoun (38.4 years), White (38.3 years) and Saline (38.2 years) were the five counties with the highest median ages (Table 7) in 1990. Eighty-seven counties had an older median age than the state (32.6 years) in 1990. Jackson (26.3 years), DeKalb (27.0 years), McDonough (27.1 years), Champaign (27.7 years) and McLean (28.8 years) were the five counties with the youngest median ages. In 2000, Hardin (42.1 years), White (42.0 years), Jo Daviess (41.6 years), Pope (41.1 years) and Henderson (41.0 years) were the five counties with the highest median ages in the state. The five counties with the youngest median ages were Jackson (27.5 years), DeKalb (28.4 years), Champaign (28.6 years), McDonough (29.0 years) and McLean (30.5 years). Both in 1990 and 2000, all five counties with the youngest median ages had major state universities. There were 89 counties in 2000 that had higher median ages than the state median age (34.7 years).

Population 85 years and older grew significantly for the state and in most of its 102 counties between 1990 and 2000. The 85 years and older population for Illinois grew by 20.6 percent during this decade. Population 85 years and older in six counties grew by more than 50 percent, 40 counties grew by 25 percent to 49.9 percent, 37 counties by 10 percent to 24.9 percent and 14 counties 0 to 9.9 percent. Only five counties had a decline (very small). These five counties were Brown (-3 persons), Edwards (-6 persons), Jasper (-6 persons), Moultrie (-39 persons) and Warren (-6 persons).

The U.S. Office of Management and Budget (OMB) announced new definitions of metropolitan and micropolitan statistical areas on June 6, 2003. A metropolitan statistical area (MSA), as defined by OMB, is a core-based statistical area associated with at least one urbanized area that has a population of at least 50,000. A metropolitan statistical area comprises the central county or counties containing the core, plus adjacent outlying counties having a high degree of social and economic integration with the central county as measured through commuting. A micropolitan statistical area (MISA) is defined as a core-based statistical area associated with at least one urban cluster that has a population of at least 10,000, but less than 50,000. It comprises the central county or counties containing the core, plus adjacent outlying counties having a high degree of social and economic integration with the central county as measured through commuting. There are 11 MSAs and 23 MISAs in Illinois (Figure 4). Composition of most MSAs have changed since the 1992 OMB definition. About 86.3 percent of the Illinois population lived in MSA counties in 2000 compared to 83.8 percent in 1990 (Table 8).

### Cities (Incorporated Places)

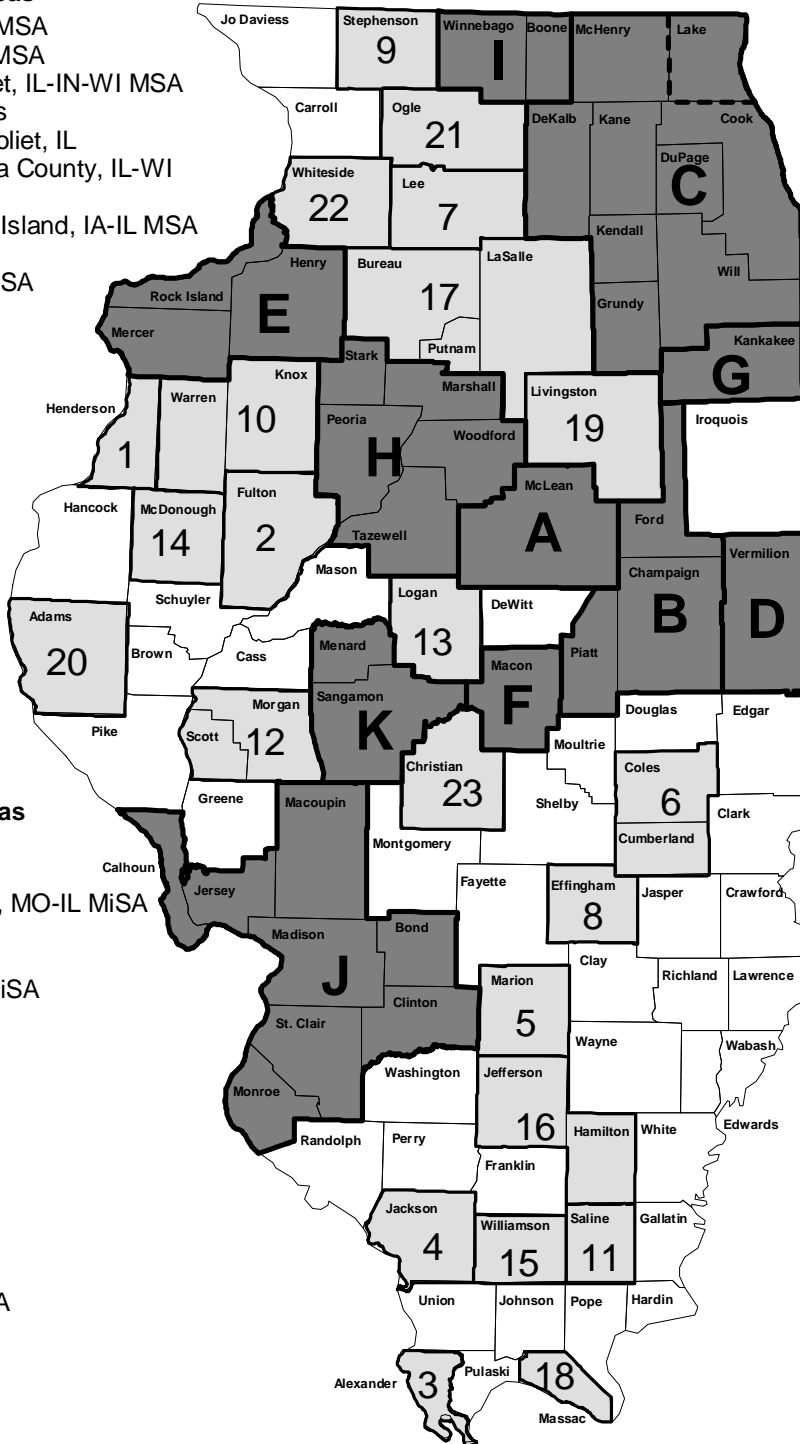

The state had 665 cities or incorporated places with populations of 1,000 or more in 2000 (Appendix B). Chicago was the most populous city in the state with a population of 2,896,016 in 2000 and 2,783,726 in 1990. Chicago has lost population every decade from 1950 to 1990. However, it had a net gain of 112,290 for 1990-2000 and loss through net migration was significantly less than for earlier decades. Although it gained population, Chicago's share of the state population dropped from 24.4 percent in 1990 to 23.3 percent in 2000. There were six cities with population more than 100,000 but less than one million; 19 cities with population 50,000 or more but less than 100,000; 89 cities with population 20,000 or more but less than 50,000; and 88 cities with population 10,000 or more but less than 20,000.

Populations for the state, its counties and incorporated places for 1990 and 2000 do not reflect any corrections made by the U.S. Census Bureau since April 1, 2000, and data for 2000 was downloaded from the Summary File 1 on the Census Bureau's Web site. Data for other years come from the Census Bureau's publications. Unlike the state and counties, incorporated places can change their populations through annexation or

deannexation. No attempt has been made to adjust 1990 incorporated place populations to reflect 2000 boundaries for purposes of 1990 to 2000 comparisons.

A “split place” has its incorporated boundaries in more than one county, where each county contains a fraction of the population (or possibly none or all). Table 9 shows the split place populations under their respective counties and the total populations.

### **Race Categories in the 2000 Census**

In the 2000 census, race and ethnicity data were collected separately, where the ethnicity question preceded the race question. The concept of race as used by the U.S. Census Bureau reflects self-identification; it does not denote any clear-cut scientific definition of biological stock. The Office of Management and Budget (OMB) issued a directive (Federal Register, July 9, 1997), replacing Statistical Policy Directive No. 15 (1977), providing a minimum standard for maintaining, collecting, and presenting data on race and ethnicity for all federal reporting purposes. Following the OMB standards, the 2000 decennial census asked respondents to “mark one or more” races for each individual, resulting in six single races and an additional 57 multiple-race categories. Separately, respondents were asked their ethnicity (Hispanic or Latino and Non-Hispanic or Latino). The race categories were

1. American Indian or Alaska Native
2. Asian
3. Black or African American
4. Native Hawaiian or Other Pacific Islander
5. White
6. Other

In Summary File 3 (SF 3), the U.S. Census Bureau did not resolve the issue of how to redistribute persons who specified more than one race category or “some other race” so that the categories would be comparable to earlier census race categories. Races may be tabulated as one race (alone) or in combination with multiple race categories. Tabulations by race category using the former method exclude individuals who chose multiple-race responses, and tabulations using the latter method potentially double-count (or triple, etc.) individuals who chose more than one race. Instead of a “nonwhite” tabulation category, the OMB directive requires the use of “Black or African American and Other Races” or “All Other Races.” Use of these standards was required by all federal programs by January 1, 2003.

Nota Bene: The following description on distribution of population by race uses information from Tables 10 and 11. Table 10 uses 1990 census race categories for comparison purposes and Table 11 uses 2000 census categories (for more details on modification of race categories, see page 33). All 2000 numbers based on the earlier race category definitions (i.e., Statistical Policy Directive No. 15) are in *italics*.

## White

In 2000, Illinois had 9,981,520 persons in the white race category, comprising 80.4 percent of the total population (Table 10). For each census since 1950, the proportion of the white population declined in the state.

Race categories of 2000 census were modified to redistribute population in some other race and two or more race categories. The National Center for Health Statistics (NCHS) further modified the numbers to make them comparable to 1990 census race categories.

Table 10

**Figure 5.  
Percent of Population Black  
by County in Illinois: April 1, 2000**

### Black or African American

In 2000, black was the second largest race category with 1,933,802 persons or 15.6 percent of the Illinois total population (Table 10). This figure is 226,397 more persons than enumerated in the 1990 census, or 13.3 percent growth for the decade (Table 10). Fourteen counties had black or African American alone populations of 10,000 or more enumerated in 2000 (Table 11). Cook County had 1,405,361 residents enumerated in the black or African American alone category or 74.9 percent of the state's black or African American alone population. St. Clair County had the second largest number with 73,666 persons. These 14 counties contained 95.2 percent of the Illinois black or African American alone population.

### American Indian or Alaska Native

According to NCHS's bridged race estimate, there were 43,660 American Indians or Alaska Natives in 2000 (Table 10). The census enumerated 31,006 persons who claimed one race. There was an increase of 80 percent in American Indians or Alaska Natives between 1990 and 2000 (Table 10). In Table 11, the five counties with the largest American Indian or Alaska Native alone populations were Cook (15,496), Lake (1,801), DuPage (1,520), Kane (1,255) and Will (1,038).

### Asian and Pacific Islander, and Other (Some Other Race)

In the 2000 census, Asian was a separate category and there were 423,603 Asians who claimed one race (Table 11). The five counties with the highest number of Asian alone were Cook (260,170), DuPage (71,252), Lake (25,105), Champaign (11,592) and Will (11,125). Native Hawaiian and Other Pacific Islander alone was a new, separate category and there were 4,610 persons in this category in 2000 census. The four counties with the highest number of persons in this category were Cook (2,561), DuPage (217), Lake (308) and Will (162). According to NCHS's bridged-race estimates, there were 460,311 Asian and Pacific Islanders in 2000, an increase of 57.4 percent from 1990 (Table 10).

The some other race alone category, reported by respondents, comprises all persons who did not choose any of the five main race categories in the 2000 census. In the 2000 census, 722,712 persons reported to be in this category (Table 11).

The state had 235,016 persons (1.9 percent) who reported two or more races in the 2000 census (Table 11). Four counties had 2 percent or more population in multiple race categories. These counties were Cook (2.5 percent), Kane (2.2 percent), Champaign (2.0 percent) and Lake (2.0 percent). Thirty-six counties had 1.0 percent to 1.9 percent of their population who were multiple race. Edgar, Menard, Edwards, Clay, Shelby, Jasper and Scott counties had less than 0.5 percent population in the multiple race category.

Hispanic or Latino (of any race)

Hispanic or Latino refers to ethnicity; it is not considered a race category by OMB. In 2000, Hispanic or Latino persons in Illinois totaled 1,530,262 or 12.3 percent of all persons (Table 12).

Table 12  
Totals, Relative Percentages and Percent Change for the Illinois Hispanic or Latino  
Population: 1970-2000

Year or Period	Hispanic	Non-Hispanic	Total
Totals :			
1970	393,204	10,720,772	11,113,976

1990-00	69.2	3.5	8.7

Source: U.S. Census Bureau

This was a 69.2 percent increase from the 904,446 persons enumerated as Hispanics in the 1990 census. Chicago had the largest Hispanic or Latino population with 753,644 persons, or 49.2 percent of the state's total. In 2000, Chicago's Hispanic or Latino population comprised 26.0 percent of the city's total population. There were 14 counties in Illinois in 2000 that had Hispanic or Latino populations of 5,000 or more (Table 13). Cook had 1,071,740 persons in this category, or 70.0 percent of the state's Hispanic or Latino population (Figure 6). The four counties with the next largest Hispanic or Latino populations were Kane (95,924), Lake (92,716), DuPage (81,366) and Will (43,768).

## **Notes on Modified Race Data Summary File and NCHS Bridged Race Categories**

The modified race summary file provides data from the 2000 census that have been modified to assign each of the persons in the “Some other race” category to an OMB race category. The modified race data include 31 race groups that are the single and multiple combinations of the OMB race categories: White; Black or African American; American Indian and Alaska Native; Asian; and Native Hawaiian and Other Pacific Islander. In the 2000 census, there were 722,712 people in Illinois who identified “Some other race” as part of, or their only race. These people were primarily of Hispanic origin. Since these people were not included in one of five OMB race categories, it was necessary to modify their race. These modifications were necessary for subsequent production of post-2000 population estimates and projections. However, the modified race file did not correct or adopt the 2000 census procedures for tabulating or coding race data, nor was it corrected for undercoverage or duplication of persons in the 2000 census. Further details on these race modifications are available at [http://eire.census.gov/popest/data/national/tables/files/mod\\_race.php](http://eire.census.gov/popest/data/national/tables/files/mod_race.php) .

The National Center for Health Statistics (NCHS) produced April 1, 2000, bridged-race population estimates under a collaborative arrangement with the U.S. Census Bureau. These estimates resulted from bridging the 31 modified race categories based on 2000 census, as specified in the 1997 OMB standards for the collection of data on race and ethnicity, to the four race categories specified under the 1977 standards. Bridging to these past categories is needed to permit meaningful comparisons of data collected under the 1977 standards with data collected under the 1997 standards. More details on the bridge file are available at <http://www.cdc.gov/nchs/about/major/dvs/popbridge/popbridge.htm> .

## Appendix B

## Illinois Cities of 1,000 or More Population: April 1, 2000

City	County	Population
Abingdon	Knox	3,612
Addison	DuPage	35,914
Albion	Edwards	1,933
Aledo	Mercer	3,613
Algonquin	Kane, McHenry	23,276
Alorton	St. Clair	2,749
Alsip	Cook	19,725
Altamont	Effingham	2,283
Alton	Madison	30,496
Amboy	Lee	2,561
Andalusia	Rock Island	1,050
Anna	Union	5,136
Antioch	Lake	8,788
Arcola	Douglas	2,652
Arlington Heights	Cook, Lake	76,031
Arthur	Douglas, Moultrie	2,203
Ashland	Cass	1,361
Ashton	Lee	1,142
Assumption	Christian	1,261
Astoria	Fulton	1,193
Athens	Menard	1,726
Atkinson	Henry	1,001
Atlanta	Logan	1,649
Atwood	Douglas, Piatt	1,290
Auburn	Sangamon	4,317
Aurora	DuPage, Kane, Kendall, Will	142,990
Aviston	Clinton	1,231
Baldwin	Randolph	3,627
Bannockburn	Lake	1,429
Barrington	Cook, Lake	10,168
Barrington Hills	Cook, Kane, Lake, McHenry	3,915
Barry	Pike	1,368
Bartlett	Cook, DuPage, Kane	36,706
Bartonville	Peoria	6,310
Batavia	DuPage, Kane	23,866
Beach Park	Lake	10,072
Beards	Cass	5,766
Beckemeyer	Clinton	1,043
Beecher	Will	2,033
Belleville	St. Clair	41,410
Bellevue	Peoria	1,887
Bellwood	Cook	20,535
Belvidere	Boone	20,820
Bement	Piatt	1,784
Benld	Macoupin	1,541
Bensenville	Cook, DuPage	20,703
Benton	Franklin	6,880
Berkeley	Cook	5,245
Centralia	Clinton, Jefferson, Marion, Washington	14,136
Centreville	St. Clair	5,951
Berwyn	Cook	54,016
Bethalto	Madison	9,454
Bethany	Moultrie	1,287
Bloomington	DuPage	21,675
Bloomington	McLean	64,808
Blue Island	Cook	23,463
Blue Mound	Macon	1,129
Bolingbrook	DuPage, Will	56,321
Bourbonnais	Kankakee	15,256
Bradley	Kankakee	12,784
Braidwood	Will	5,203
Breese	Clinton	4,048
Bridgeport	Lawrence	2,168
Bridgeview	Cook	15,335
Brighton	Jersey, Macoupin	2,196

Appendix B (continued)  
 Illinois Cities of 1,000 or More Population: April 1, 2000

City	County	Population
Broadview	Cook	8,264
Brookfield	Cook	19,085
Brookport	Massac	1,054
Buffalo Grove	Cook, Lake	42,909

## Appendix D

### GLOSSARY

Average Annual Rate of Change	It is the total change divided by the number of years.
Baby Boom	The increase in the number of births that occurred during the late 1940s and through the 1950s in the United States.
Census Bureau	It is a federal statistical agency responsible for collection of census and survey data and is part of the U.S. Department of Commerce.
Cohort	A group of people who experience a major event in the same short period (e.g., one or five years). A birth cohort (persons born in the same year or five-year period) is an example.
College Dormitories	They include college students in dormitories (provided the dormitory is restricted to students who do not have their families living with them), fraternity and sorority houses, and on-campus residential quarters used exclusively for those in religious orders who are attending college. College dormitory housing includes university-owned, on-campus and off-campus housing for unmarried residents.
Correctional Institutions	They include prisons, federal detention centers, military disciplinary barracks, jails, police lockups, halfway houses used for correctional purposes, local jails, and other confinement facilities, including work farms.
Enumeration/Census	This is a complete count of the inhabitants, often along with certain characteristics, for a defined geography.
Estimates	A systematic estimate of the current or recent past population of a geographic area based on current or recent past births, deaths, net migration and institutional population.
FSCPE	This is the federal - state cooperative for population estimates comprising all the states and the U.S. Bureau of the Census. It is engaged in exchanging input data for producing population estimates and in developing methods for this purpose.
Group Quarters	All people not living in housing units are classified by the Census Bureau as living in group quarters. Two general categories of people live in group quarters: (1) institutional population and (2) noninstitutionalized population.
Incorporated Place	It is a place legally in existence with defined boundaries, such as cities, towns and villages.
Immigration	It is defined as migration to a specific place (e.g., into the state of Illinois).

Institutional Population	It includes people under formally authorized, supervised care or custody in institutions at the time of enumeration. Such people are classified as “patients or inmates” of an institution regardless of the availability of nursing or medical care, the length of stay, or the number of people in the institution.
MARS	This is the modified age, race and sex retabulation file of the 1990 census data. The main purpose of this retabulation was to improve the distribution of the “other race” category (mostly Hispanic) and population under age 1 year.
Median Age	The age at which 50 percent of the population are younger than that age and 50 percent of the population are older than that age.
Metropolitan/MSA	A metropolitan statistical area (MSA), as defined by the federal Office of Management and Budget, is a core-based statistical area associated with at least one urbanized area that has a population of at least 50,000. A metropolitan statistical area comprises the central county or counties containing the core, plus adjacent outlying counties having a high degree of social and economic integration with the central county as measured through commuting.
Micropolitan/MISA	A micropolitan statistical area (MISA) is defined as a core-based statistical area associated with at least one urban cluster that has a population of at least 10,000, but less than 50,000. It comprises the central county or counties containing the core, plus adjacent outlying counties having a high degree of social and economic integration with the central county as measured through commuting.
Migration	It is defined as a change of usual residence between clearly defined geographic units, such as counties or cities.
Military Quarters	It includes military personnel living barracks and dormitories on base, transient quarters on base for temporary residents (both civilian and military), and military ships.
Natural Increase	It is the difference between the number of births and the number of deaths for a given time and place.
Net Migration	It is the difference between immigration and outmigration.
Noninstitutional Population	It includes people who live in group quarters other than institutions. It also includes staff residing in military and nonmilitary group quarters on institutional grounds who provide formally authorized, supervised care or custody for the institutionalized population.

Nursing Homes	It comprises a heterogeneous group of places providing continuous nursing and other services to patients. The majority of patients are elderly, although people who require nursing care because of chronic physical conditions may be found in these homes regardless of their age.
Other Institutions	It includes (psychiatric) hospitals; hospitals or wards for chronically ill; schools, hospitals, or wards for the mentally retarded; schools, hospitals, or wards for the physically handicapped; hospitals and wards for drug/alcohol abuse; wards in general hospitals for patients who have no usual home elsewhere; wards in military hospitals for patients who have no usual home elsewhere; and juvenile institutions.
Other Non institutional Group Quarters	It includes group homes, religious group quarters, dormitories for workers, crews of maritime vessels, soup kitchens, shelters for abused women, staff residents of institutions, etc.
Outmigration	It is defined as migration from a specific place (e.g., away from the state of Illinois).
Projections	A systematic estimate of the future population of an area based on an assumed level of population growth and/or assumed levels of births, deaths and net migration.
Pyramid	It is a graphic device specifically designed for description and analysis of age-sex composition of a population.
Sex Ratio	It is the number of males per 100 females.
