OVERVIEW

This catalog of publications has been developed by the Illinois Department of Public Health, Office of Epidemiology and Health Systems Development. It is intended to assist users in identifying and obtaining publications and materials available from the Department.

We are attempting to simplify access to printed resources of the Department. Because the nature of health issues is so complex, the need for accurate, easily accessible information is very important. Your comments and suggestions regarding the content and format of this document are welcome.

The listings of available publications and materials are organized by originating unit within the Department. The largest organizational unit within the Department is the office. Each office is further subdivided into bureaus, centers or divisions. Bureaus, centers or divisions, in turn, are often subdivided into sections, units or programs. The materials available are listed under the appropriate division, section or program. Publications available in languages other than English are listed separately. This year we have added an index of publications by title.

Contacts for obtaining the publications listed in this catalog are noted within each segment. Publications available from the Department's Center for Health Statistics may be ordered by using the form on page 21.

Additional copies of this catalog may be obtained from—

1. After the Flood

Flood victims can discover ways to protect themselves against diseases and other hazards that may occur as a result of flooding.

2. Summer? No Sweat

Avoid some of the health and safety hazards associated with warmer weather. This summer survival guide contains information on heat exhaustion, insect bites, swimming pool safety, safe food handling and other topics.

Learn how to prepare for and cope with natural and man-made disasters such as tornadoes, floods, earthquakes, nuclear power plant emergencies and others.

4. Weathering Winter

Winter health advice and safety tips to avoid hazards associated with the season; covers topics such as furnace and fireplace safety, safe winter driving, influenza, frostbite and more.

5. After the Flood Emergency Preparedness Manual

Brings together information about public health and safety issues that may arise after a major flood and about additional resources and programs that may help flood victims start the process of recovery. Includes sections on safety, food, water and hygiene, disease and injury control, mental health, and pest control.

6. Heat Bulletin

Answers commonly asked questions about hot weather and heat-related illnesses and how to safely cope with these conditions. Includes a heat index table.

7. The Rise and Fall of Disease in Illinois, Vols. 1 and 2

Written and first published in 1927, this two-volume work covers the first 50 years of Illinois’ public health efforts to overcome infectious diseases, such as typhoid and smallpox, and to conquer the inadequate sanitary conditions that threatened the state’s water and food supplies.

These two volumes continue the historical overview of the Department’s efforts to ensure the health and safety of Illinois’ citizens.

CENTER FOR RURAL HEALTH

1. Medically Underserved and Shortage Designations in Illinois

Explains the criteria for designating of health professional shortage areas, medically underserved areas, and the state’s physician shortage areas. Lists of designated areas are included.

2. Illinois Physician Shortage Areas

A list of all the areas in Illinois designated as physician shortage areas. Federally designated health professional shortage areas are included. The list is used by recipients of the Illinois Medical Student Scholarship in identifying placements to fulfill their obligation.

3. Illinois Communities - Practice Where You Can Really Make a Difference

-4-
Explains the advantages for health care providers of practicing in Illinois. It focuses on the community, people, opportunities and lifestyles that make Illinois so attractive. It is used mainly by communities recruiting physicians.

4. Center for Rural Health Annual Report

Outlines activities of the past year completed by the Center for Rural Health.

5. Medical Student Scholarship Annual Report

Annual report describing recipients of the Department’s Medical Student Scholarship Program.

6. Rural Telemedicine in Illinois

Describes background and current use of communications technology to meet health care needs in rural areas in Illinois. This is a preliminary report with a final report to be available in Summer 1998.

1. A Women’s Health Quiz

Thirty questions and answers on six women’s health topics.

2. Illinois Breast and Cervical Cancer Program (English, Spanish)

Early detection methods for breast and cervical cancer and the Illinois Breast and Cervical Cancer Program. Includes a detachable card to request more information.

3. Breast and Cervical Cancer Research Fund/Alzheimer’s Disease Research Fund

Explains the two research funds and guidelines for research grants. Aimed at potential applicants from Illinois for research grants in breast and cervical cancer and Alzheimer’s disease.

4. Breast Cancer, Your Right to Know (English, Spanish)

Developed in response to the legislative mandate in PA 85-1426. Addresses screening, early diagnosis, treatment and prevention, based on guidelines of the American Cancer Society and the National Cancer Institute. Encourages the use of preventive practices and offers information regarding present treatment options.

5. Early Detection is the Key

Breast cancer symptoms and early detection methods.

6. Breast Self-exam Shower Card (English, Spanish)

In easy-to-read language, illustrates how to examine one’s breasts for signs of cancer.

7. Women’s Health Fact Sheets

-Heart Disease
-Breast Cancer
-Menopause
-Osteoporosis
-Mental Health
-Domestic Violence

VITAL STATISTICS PUBLICATIONS

Vital statistics publications are based largely or entirely on data collected through the vital records system of Illinois. Included in this system are births, deaths, marriages and divorces. Certain publications are annual and seek to establish yearly benchmarks in critical areas of health status. Others are cyclical, recurring every five years. This enables the user to follow trends in key areas, such as suicide or homicide.

Occasionally, a topic is viewed as so important that a monograph or supplement to the vital statistics annual is developed. Whatever the topic or type of publication, it is valuable to recognize that hard copy documents are only one part of the entire vital statistics information system. Microfiche, sterilized tapes (names and social security numbers not reported) and floppy disks also serve as media for more detailed data than that furnished in hard copy documents.

1. Vital Statistics Illinois (annual)

A summary of births, deaths, marriages and divorces among Illinois residents. Birth and death data are reported by county and for the larger cities of the state. This volume also briefly recounts the vital statistics reporting system and cause of death classification.

These summaries are available for the following years:

<table>

2. Vital Statistics Special Reports

a. Recent Trends in Mortality from Respiratory System Cancer Among Illinois Residents (January 1988)

Mortality rates from respiratory system cancer by age, race and sex; data for 1969-71, 1979-81 and 1984-86.

b. Recent Trends in Homicide Among Illinois Residents (March 1988)

Homicide statistics by age, race and sex; data for 1969-71, 1979-81 and 1984-86.

c. Recent Trends in Mortality from Breast Cancer Among Illinois Women (June 1988)

Mortality rates from drugs by age, race and sex; includes data on accidental deaths from drugs, according to type of drug.

Fatalities from firearms by age, race and sex.

Death rates from diabetes by age, race and sex.

**ILLINOIS HEALTH REPORT SERIES**

The Illinois Health Report Series was initiated in late 1981. It is designed to provide data users with a source of Illinois-specific health data. Typical reports address long-term care, hospital use, health interview studies and life expectancy. Reports are available in hard copy or on microfiche.

1. 87-1 Hospital Beds in Illinois: Alternative Systems and Bed Counts (June 1987)

   Provides insights into how hospital utilization data are collected, analyzed and used by key organizations in Illinois. The manner in which hospital beds are defined and counted differs among organizations in response to their specific goals and objectives.

   Updated data collected by an annual survey of long-term care facilities. Data presented include characteristics of facilities, residents and trends from 1981 through 1986.

3. 88-1 The Public Health Index: Measuring the Health of Illinois Residents (January 1988)

   Reviews health indicators to develop a gauge of societal health in Illinois. Presents the case for the final selection of the Public Health Index. Trends in health for the period 1970 through 1986 are reviewed and presented.

4. 88-2 Health in Illinois: A Data Compendium (February 1988)

   Presents a concise overview of key health status and sociodemographic information elements for Illinois. Functions well as a companion document for 88-1. Based on 1984 data.
5. 88-3 Health Care in Rural Illinois: Strategies for Change (March 1988)

Major changes in rural Illinois and the health care system that serves it have made it imperative to rethink strategies for serving the health needs of rural residents. This document provides alternatives to serve as blueprints in developing strategies for change.

Reports the results of a voluntary survey of licensed home health care agencies, highlighting the differences between proprietary and nonproprietary agencies.

7. 88-5 An Examination of Medical Care Costs of Patients with AIDS in Illinois (June 1989)

Provides a detailed description of the methodology used to study the medical care costs of patients with AIDS and the cost figures developed through its use. Carefully documents actual costs as opposed to more global estimates based on general figures or projected needs.

Provides a comprehensive series of the most commonly requested population figures; designed particularly for use in preparing grants, plans and reports.

9. 88-7 A Review of Proprietary Health Facilities and Services in Illinois (June 1988)

The expansion of proprietary ownership and/or management of facilities and services has been a subject of intense study, culminating in a series of conferences during 1987.

Updated data collected by an annual survey of long-term care facilities, includes characteristics of long-term care facilities and their residents.

Reviews the many sweeping changes in hospital utilization and characteristics during the period from 1982 through 1986 in Illinois.

12. 89-1 Basic Health Care for the Medically Indigent (January 1989)

Explores the issue of how best to ensure access to basic health care services by the medically indigent population of Illinois. Provides background information and then presents a series of alternatives, consisting of broad conceptual strategies, to improve access.

Using nutrition surveillance data derived from Women, Infants and Children (WIC) and Early and Periodic Screening, Diagnosis and Treatment (EPSDT) program data, this document provides a nutrition related profile of participating women and children.

Key data findings derived from a total of 216,361 records of infants and children in the Illinois WIC program. The nutritional data are particularly useful in planning local health programs.

Details Illinois' progress toward the U.S. Surgeon General's 1990 objectives for maternal and child health. The Division of Family Health's mortality and natality statistics are appended.

A source for population estimates and data; population trends and other highlights are included along with estimate methodology and a listing of sources for other information.

17. 89-7 Midcourse Review of Illinois' Infant Mortality Reduction Initiative (June 1989)

Analyses of changes in infant mortality and other selected birth outcomes in Illinois from 1983 to 1987. Areas targeted by Families with a Future, Illinois' infant mortality reduction initiative, are contrasted with other areas of the state. Data are from Illinois vital records.

Updated data collected by an annual survey of long-term care facilities, includes characteristics of long-term care facilities and their residents.

A source for population estimates and data; population trends and other highlights are included along with estimate methodology and a listing of sources for other information.

Significant changes in rural health care delivery call for the development of innovative strategies. This document summarizes the work of the Rural Health Task Force and offers recommendations to increase access to health care in rural areas.

A compendium of currently used data set descriptions, listing such items as purpose, design, contact person, location, limitations, restrictions and accessing. An index of data elements is cross-referenced to each referred data file.

Key data findings derived from a total of 215,051 records of infants and children in the Illinois WIC program. Nutritional data are particularly useful in planning.

Contains 1990 census data for total population by race for Illinois counties and incorporated places, text sections on data trends and highlights, and a discussion on 1990 census data.

A summary of data collected by the hospital bed inventory and the annual hospital questionnaire for years 1986, 1987 and 1988. Where available, U.S. figures also are cited.

25. 91-3 Annual Summary of Nutrition Surveillance Data, 1989 (March 1992)

Key data findings derived from a total of 211,625 records of infants and children in the Illinois WIC program. Nutritional data are particularly useful in planning.

Updated data collected by an annual survey of long-term care facilities, includes characteristics of long-term care facilities and their residents.

27. 94-1 Database and Data File Resource Guide (July 1994)

A compendium of currently used data set descriptions, listing such items as purpose,
design, contact person, location, limitations, restrictions and accessing. An index of data elements is cross-referenced to each referred data file.

A source for population estimates and data; population trends and other highlights are included along with estimate methodology for the state, counties and cities.

A source for population estimates and data; population trends and other highlights are included along with estimate methodology for the state, counties and cities.

31. 96-2 The Burden of Diabetes in Illinois

Information to educate citizens and policymakers about diabetes. Education will enable better decisions and creative solutions to complex issues underlying diabetes.

32. 96-3 Database and Data File Resource Guide (October 1996)

A compendium of currently used data set descriptions, listing such items as purpose, design, contact person, location, limitations, restrictions and accessing. An index of data elements is cross-referenced to each referred data file.

A source for population estimates and data; population trends and other highlights are included along with estimate methodology for the state, counties and cities.

VITAL STATISTICS BASIC RESEARCH SERIES

This quarterly series was initiated October 1996. Each issue of about eight pages contains an original research article involving an aspect of Illinois vital statistics and the latest vital statistics data for Illinois, Chicago and counties.

4. 1-4 Vital Statistics Basic Research Series Vol. 1, No. 4 (July 1997)

5. 2-1 Vital Statistics Basic Research Series Vol. 2, No. 1 (October 1997)

The pros and cons of standardized rates; vital statistics for 1995 and 1996.

Regional fertility characteristics in Illinois; vital statistics for 1995 and 1996.

CERTIFICATE-OF-NEED PUBLICATIONS

The Certificate-of-Need (CON) program is a major state regulatory tool in the area of health facilities and equipment. While the basic purpose for collecting CON data is the implementation of statutory mandates, the data collected through this program are useful for other purposes. Annual surveys, for example, provide trend line data for the state, the regions or individual facilities in such areas as occupancy, length of stay, overall utilization and accessibility.

Certificate-of-Need Rules and Regulations

A) Part 1100 -- Narrative and Planning Policies

B) Part 1110 -- Processing, Classification Policies and Review Criteria

C) Part 1120 -- Financial and Economic Review Criteria
D) Part 1130 -- Processing of Application for Permit and Validity of Permits

E) Part 1180 -- Practice and Procedure in Administrative Hearing

F) Part 1190 -- Permit Application Fees

H) Part 1235 -- Health Care Worker Self-referral

I) Part 1250 -- Appropriateness Review

J) Part 1260 -- State Board Policy Statement Regarding Reserve Bed Capacity

K) Part 1925 -- Public Information, Rulemaking and Organization

L) Current Inventory of Health Care Facilities and Services and Need Determination Vol. 1, (Parts I-V) -- Hospitals and Associated Services*

M) Current Inventory of Health Care Facilities and Services and Need Determination Vol 2, (Part VI-VII) -- Long-Term Care*

N) Illinois Health Facilities Planning Act

*NOTE: Bed inventories for hospitals and long-term care facilities are prepared annually. Due to the time lag required to prepare the document, the 1997 bed inventories contain fiscal year 1995 data.

POLICY PAPERS AND STUDIES

A. Human Services Plan

Description of fiscal years 1992-1994 Human Services Plan, detailing Department programs (goals, activities, data and accomplishments), with a focus on integrating and meeting the Healthy People 2000 national health objectives. Describes 16 preliminary health priorities established through the Statewide Health Needs Assessment in a succinct data presentation.

PT II  Human Services Plan - 1989-1990: Part II Policy Issue Papers

A series of policy issue papers addressing major problems that affect the Department. In this
edition, the Department presents three issue papers: Injury Control, Basic Health Care for the Medically Indigent and Regulatory Reform Agenda.

B. MI A Proposal for an Ambulatory Care System in Chicago and Cook County (November 1987)

Written jointly by the Illinois Department of Public Health and the Chicago Department of Public Health, this proposal calls for restructuring the ambulatory health care delivery system that serves poor and medically indigent populations in Cook County.

C. IS An Assessment of the Impact on Access to Health Care in Chicago Resulting from the University of Illinois Affiliations with Michael Reese Hospital and Medical Center and Cook County Hospital (April 1989)

In December 1988, the University of Illinois announced its intention to affiliate its medical school with Michael Reese Hospital in Chicago and to lease the University of Illinois Hospital to Cook County. The proposed affiliations sparked heated public debate about the effect these changes would have on access to health care for the poor. At the request of the university, the Department prepared this assessment.

D. Chicago and Cook County Health Care Action Plan

The Chicago and Cook County Health Care Summit, convened by Gov. James R. Thompson, Chicago Mayor Richard M. Daley and Cook County Board President George W. Dunne in August 1989, examined and made recommendations on public health care delivery, coordination and access in Cook County, Illinois. The resulting Health Care Action Plan was presented on April 18, 1990.

   VL I Volume I: Executive Summary (approx. 40 pages)
   VL II Volume II: System Analysis and Design (approx. 440 pages)
   VL III Volume III: Appendices (approx. 210 pages)
   VL IV Volume IV: Public Testimony (approx. 1,600 pages)

E. SP The Illinois Public Health Surveillance System (IPHSS)

The Office of Epidemiology and Health Systems Development has been developing a microcomputer-based public health data retrieval system referred to as the Illinois Public Health Surveillance System (IPHSS). This paper orients potential users to the system and outlines current plans for the system's future development.

F. AC Final Report of the Acute Care Task Force (June 1992)

Overview of the work of a task force established by the Department to analyze various new
models of acute health care delivery employed in other states and to recommend legislative and administrative actions to enable the development of those models that hold promise for Illinois residents. The task force recommended model legislation designed to demonstrate and evaluate alternative health care delivery models within a five-year time frame. Both birth centers and postsurgical recovery care centers were examined and recommended for study.

G. FS A Study of the Feasibility of Establishing a Health Insurance Plan for Children (June 1992)

A study conducted in conjunction with the Illinois departments of Public Aid and Insurance of the cost and feasibility of establishing a child health insurance plan to provide primary and preventive health care services to uninsured Illinois children. Reviews plans operating in other states; discusses design parameters, specifying eligibility policies, three alternative benefits packages, and administrative arrangements; estimates eligible and enrolled populations and probable costs; and identifies possible financing approaches. This document was the basis for legislation introduced to the Illinois General Assembly in fiscal year 1992.

An overview of health in Illinois adopted by the State Board of Health. The document presents and analyzes data in six major categories of indicators—demographic and socioeconomic characteristics, general health and access to care, maternal and child health, chronic diseases, infectious diseases, and environmental/occupational health and injury control—and identifies 16 preliminary priorities for program intervention. The foundation for a systematic approach to community health needs assessment, the indicators encompass most of the priority areas addressed in the Healthy People 2000 national health objectives.

I. CO Challenge and Opportunity: Public Health in an Era of Change (March 1996)

An overview of recent developments that have defined the purpose, philosophy, and implementation of public health practice in Illinois, including updated discussions of each health priority area identified in Statewide Health Needs Assessment: Towards a Healthy Illinois 2000, augmented by community health problem priorities selected in the Illinois Project for Local Assessment of Needs. The document includes a prospective view of health systems changes and emerging health problems that will influence public health in the near future.

J. HPU Health Policy Update (periodic, beginning in 1995)

Papers that explore various topics in public health policy. The papers in this series examine state health policy development, cost benefits of public health activities, the regulatory role of public health programs, the role of the public health laboratory and the life care facilities program.
K. Unit I IPLAN Training Program Manual (Spring 1996)

A manual that examines public health and community resources and strategies, as well as provides information about the Illinois Project for Local Assessment of Needs (IPLAN) process. Distributed to local health department (LHD) staff during six regional training sessions in spring 1996, the Unit I manual serves LHD staff by focusing on the program areas of assessment and implementation. The document contains a history of IPLAN; an overview of Illinois public health in transition; formulas and narrative guides for data analysis; an introduction to community health assessment tools such as the IPLAN Data System 2.0, CDC Wonder/PC, and the Illinois Behavioral Risk Factor Surveillance System (BRFSS); components of program implementation; and several examples of proven intervention strategies. In addition, the manual contains a glossary of health and data analysis terms as well as appendices that describe prioritization methods, community health models, IPLAN Data System 2.0 related health indicators, maternal and child health issues, and external funding sources.

L. IPLAN Data System 2.0 User’s Manual (November 1995)

A manual and overview of the IPLAN Data System 2.0, a user-friendly computer software program that provides access to essential public health data for assessment and health planning purposes. Specific installation instructions as well as descriptions of indicator categories and prominent data sources. An expanded appendix of detailed reference information, including data source, data availability, mathematical formula, and contact phone number, for each public health indicator.

M. ITP Unit II IPLAN Training Program Manual on Evaluation and Marketing of Public Health (Spring 1997)

Related lecture notes and articles on a variety of topical issues including Harris Poll survey on public health; the script for “A Day in the Life of Public Health” video; two chapters from Alan Andreasen’s “Marketing Social Change”; Internet resources on social marketing; a marketing plan shell; evaluation articles; program evaluation checklist; “Tools for Decision-Making in Marketing of Public Health”; media advocacy; glossary; and bibliography.

N. CNC Turning Point: Collaborating for a New Century in Public Health (July 1997)

Illinois is one of fourteen states selected by the Robert Wood Johnson and W.J. Kellogg foundations to receive a grant to support a strategic development initiative, Turning Point: Collaborating for a New Century in Public Health. The purpose of the Illinois initiative, Public Health Futures Illinois, is to improve public health by redefining the public health system, identifying infrastructure needs and developing approaches to address these needs. To accomplish this goal, strategic partnerships from the public, private and voluntary sectors will coalesce to integrate prevention efforts in the public health system. Four partnerships, Public Health Futures Illinois, the state partnership; the Chicago Partnership; the (Will County)
Partnership for a Healthier Community; and the Decatur Community/Macon County Partnership were funded by the foundations to conduct the initiative, during calendar years 1998 and 1999. Local partnerships will receive support through calendar years 1998, 1999, and 2000. The state’s Letter of Intent describes Illinois’ readiness to embark on a renewed strategic planning process. The Illinois application provides a detailed work plan for accomplishing the initiative’s goals and objectives.

O. IPR Suggested Guidelines for IPLAN Recertification (Spring 1998).

Step by step guide for local health departments regarding recertification requirements addressing the Illinois Project for Local Assessment of Needs (IPLAN) on community health needs assessment and community health planning.

Division of Epidemiologic Studies

Breast and Cervical Cancer Profiles

Each profile compiles and interprets data from a variety of information sources. Identifies women by age, race and Hispanic origin who need additional interventions in order to achieve the Healthy People 2000 objectives on breast and cervical cancer mortality. The selection of county-specific categories is based on women who have a higher mortality or incidence of breast and /or cervical cancer compared with the female population in Illinois or the U.S.

This profile for the state of Illinois was produced to evaluate the status of Illinois women. Both the average age-adjusted breast and cervical cancer mortality rates for Illinois women from 1988 through 1994 remain above the Healthy People 2000 goals. However, more breast cancers are being detected at earlier stages among both black and white women and in younger as well as older age groups. Mammography screening programs initiated in 1987 may be having an impact.

Illinois Women’s Health Data Book

Compiles much of the available state data on a wide range of issues central to the understanding of women’s health issues in Illinois. Every attempt was made in gathering data to get information not only by gender, but also by age, race, and ethnicity. This publication serves as a reference for planners, researchers, policy makers, and state and local staff, as well as other health professionals who seek an overview of health status, programming, or funding of women’s health issues in Illinois.

Illinois State Cancer Registry Public Data Set

In ASCII format, sanitized individual records of cancer incidence among Illinois residents diagnosed from 1990 through 1994. Separate files are available for the state (IL9094.DAT), county (CNTY9094.DAT), and Zip Code area (ZIPCD9094.DAT). Confidentiality is maintained by aggregating data within individual records into categories, the number of which depend on the size of the geographic area.

The files include incidence data for invasive cancers only with the exception of cancer of the bladder. Carcinoma in situ of the breast is provided in a separate category. Non-melanoma skin cancers, cases reported with unknown or "other" sex, and cases with an unknown age are omitted.

Identification of cancer cases in ISCR is dependent upon reporting by hospitals as mandated by state law. Reporting from Illinois hospitals is considered to be 97 percent complete. In addition, ISCR has
agreements with other central cancer registries in California, Florida, Indiana, Iowa, Kentucky, Michigan, Missouri, Wisconsin, and the Mayo Clinic in Minnesota to exchange cancer data. Completeness of out-of-state reporting depends upon the years of operation of these other central registries, the extent of their identification of out-of-state residents, and their standards of quality.

Brochures

1. Illinois State Cancer Registry

2. Adverse Pregnancy Outcomes Reporting System

3. Lead In Industry - A Guide for Employers

4. Working with Lead - A Guide for Employees (English, Spanish)

Epidemiologic Report Series (ERS):

   The initial data report for Illinois, the public health regions, and the city of Chicago compiled by the Illinois State Cancer Registry. Tables for each area describes the cancer incidence by site, sex and age and the stage of disease at the time of diagnosis by sex and age.

   The epidemiology of the disease during the period 1985 to 1987; includes the implications of these results for active cancer surveillance by the Illinois State Cancer Registry.

   Protocols and findings from recently completed studies are described; includes casefinding, reabstract, inter-hospital reliability, completeness of individual data elements and data entry.

The epidemiology of the disease in Illinois during the period 1985 through 1987; discusses implications of these results for active cancer surveillance by the Illinois State Cancer Registry.

The incidence in Illinois and selected clinical aspects; data were collected from reports to the Adverse Pregnancy Outcomes Reporting System for the period of July 1987 through June 1988.

Details on deaths and the economic costs attributable to smoking in Illinois. Estimates were developed using essentially the same methods as those of the national Centers for Disease Control and Prevention, but incorporating the analysis information on smoking in Illinois from the Illinois Behavioral Risk Factor Surveillance Survey for 1985.

Provides three-year average annual cancer incidence data. Presents cancer incidence rates (age-specific and age-adjusted) by site, sex, age and county. Cases are presented by race for counties with a sufficiently large nonwhite population.

Incidence data are presented by diagnostic group, race, sex and age.

A comparison of acquired immunodeficiency syndrome/Kaposi's sarcoma (KS) cases with KS cases for 1986 through 1987 by demographic characteristics and clinical presentation.

Cancer incidence rates among blacks and whites in Cook County, with particular focus on variations in cancer incidence rates among blacks, by region of birth.

Age-specific and age-adjusted cancer incidence rates from 1986 to 1987 are presented in tables by site and sex.

Compares smoking and nonsmoking mothers and describes characteristics of the smoking mothers using data collected from reports to the Adverse Pregnancy Outcomes Reporting System between July 1987 and August 1988.

Discusses implications of the results for active cancer surveillance by the Illinois State Cancer Registry. Tables present mesothelioma cases by sex, race, age and occupation.

Describes the reported occurrence of neuroblastoma in its relation to age, sex, race, method of diagnosis, stage of disease at diagnosis and geographical distribution of cases by county.

Data from the Illinois State Cancer Registry from 1986 through 1988 were analyzed to examine the epidemiologic features of the two morphologic types of esophageal cancer: squamous cell carcinoma and adenocarcinoma.

Tables present cancer incidence, as reported to the Illinois State Cancer Registry, by age group, sex and community area of residence at the time of diagnosis. For community areas with a sufficiently large population of white, black or other races, the data also are presented by race (white, black, other). Race-specific community area data are included only if the community area has a race-specific population of at least 7,500 persons and a cancer incidence for 1986 through 1989 averaging 10 cases or greater.

This study, conducted with technical assistance from the federal Agency for Toxic Substances and Disease Registry, evaluated blood levels of volatile organic compounds in residents of southeast Rockford after elevated levels of these compounds were found in the groundwater.

Addresses the issue of pesticide poisoning surveillance in Illinois. The specific objectives were 1) to determine the incidence of pesticide poisoning in Illinois using existing disease and hazard databases, 2) to compare the utility of these existing databases for statewide surveillance of pesticide poisoning, and 3) to recommend a strategy for active surveillance of pesticide poisonings in Illinois.

Describes the development of an algorithm to match anonymous hospital discharge records collected from Illinois hospitals. Based on the assumption that specific combinations of occupational disease code, sex, ZIP code and date of birth would identify an individual with multiple hospitalizations. Matches with the algorithm reduced the 1986 case estimates from 597 to 499 for all cases of coal workers' pneumoconiosis, asbestosis and silicosis.

21. Epidemiology of Retinopathy of Prematurity in Illinois, ERS 92:3 (June 1992)

Describes the epidemiologic characteristics of infants with retinopathy of prematurity as reported to the Adverse Pregnancy Outcomes Reporting System from July 1987 through December 1988.

Provides the five-year average by county and state. Tables present incidence by cancer group, sex, age and county of residence. Age-adjusted, site-specific cancer rates are presented by race and ethnicity for counties with a sufficiently large minority population.

A summary of the elevated blood lead level data received from laboratories between April 1, 1990, and September 30, 1991. Describes referrals to the divisions of Family Health and Environmental Health for intervention activities.

A population-based study with medical record review of breast cancer patients as part of a
larger study of an oncology outreach program to improve cancer management for rural patients within community hospitals. Compares the breast cancer care received by the rural population before the oncology outreach program with that of the contiguous urban population.

Evaluates risks by linking birth and death certificates and offers a detailed analysis of the major components of infant mortality. Data from the 1980 to 1989 matched birth-death files were examined to determine trends in the infant mortality risks for white and black Illinois infants by age at death and leading causes of death.

26. Effectiveness of an Oncology Outreach Program, ERS 93:4 (May 1993)

In late 1987, the Rural Illinois Cancer Consortium (RICC) was formed with five rural hospitals to improve access to state-of-the-art care in a patient's community by bringing expertise to the rural community hospitals on a regular basis. This study used medical record reviews to compare breast cancer treatment received by patients seen in the rural hospitals affiliated with RICC in contrast to those seen in other rural facilities.

A record-linkage study of cancer and associated adverse pregnancy outcomes in infants younger than 1 year of age described by cancer groups, race and sex. Data were collected from reports to the Adverse Pregnancy Outcomes Reporting System and the Illinois State Cancer Registry.

Five injuries identified as likely to be occupation-related: lead poisoning; metal poisonings other than lead; crushing injury to the lower arm; thumb or finger amputation; and chemical burns to the eye. Hospital discharge records were used to estimate incident cases, to assess the burden of occupational injuries on low income persons, and to identify potential geographical clusters.

Mortality and age-, race- and stage-specific incidence data are used to identify populations in need of more intensive cancer control interventions.

Demonstrates the impact of both intrastate and interstate case ascertainment on state and local cancer rates.

Uses data from the matched birth-death files to describe recent trends in maternal characteristics that have been identified in previous research as strongly related to infant mortality.

Presents data on fatal occupational injuries in Illinois for 1992, as compiled for the Census of Fatal Occupational Injuries.

Provides annual cancer incidence data for the state of Illinois for both sexes and whites, blacks, persons of other races, Hispanics, and non-Hispanics.

Presents data on cancer incidence for the state as a whole and for each county for 1987-1991 as compiled by the Illinois State Cancer Registry.

Provides incidence and mortality information on prostate cancer in Illinois. Annual rates and comparison information of Illinois data with U.S. rates describe the impact of this disease on Illinois males.

Presents data on fatal occupational injuries and illnesses in Illinois for 1993, as compiled for the Census of Fatal Occupational Injuries.

Data reported to the Illinois State Cancer Registry (ISCR) by age group, sex, and community area of residence at the time of diagnosis. For community areas with a sufficiently large population of white, black, or other races, the data are presented by race.

Sudden infant deaths syndrome (SIDS) accounted for more than 50 percent of the difference in mortality between black and white infants in Illinois during 1980-1989. Of the total deaths due to SIDS, 51 percent occurred among black infants for a mortality rate of 4.24 per 1,000 live births or 143 black infant deaths each year. The disease was the leading cause of infant death among black infants, accounting for nearly 19 percent of all black deaths but 46 percent of all black postneonatal deaths.

41. Gender Differences in Assaults and Violence in the Workplace, United States, 1993, ERS 95:3 (April 1995)

Violence has emerged as a major public health issue for the 1990s. Male victims were more likely to be Hispanic, foreign born, workers in urban counties, and in the Northeast. They were more likely to be self-employed, working in protective services of transportation, and killed on the street. Females were most often victims in the morning hours after sunrise and were more likely to be working for pay in rural counties, employed in office work or social services, and assaulted in a public building.

42. Annual Cancer Incidence by Cancer Type, Sex and Race, Illinois 1986-1993, ERS 95:4

43. Using BRFSS Data For Small Area Analysis of Cancer Screening Behaviors, ERS 95:5 (June 1995)

Behavioral Risk Factor Surveillance System (BRFSS) data on breast and cervical cancer screening behaviors for 1987 to 1991 were aggregated into one data set. All Illinois counties were classified in to one of four sub-state regions based on population size, population density, and Beale codes. Regions were compared on screening behaviors and their associations with age, race, income and education. The prevalence of these behaviors did not vary widely among
regions. However, in each region, the associations with age, race, income and education did. These characteristics are important in segmenting target populations for successful intervention. We describe a useful technique to use BRFSS data for small area analysis that did not compromise statistically meaningful interpretation.

This report is the third in a series of surveillance reports issued by the Illinois Department of Public Health’s Adverse Pregnancy Outcomes Reporting System monitoring the prevalence of birth defects in Illinois. Data presents the prevalence of Birth Defects among Illinois and Chicago newborns from 1993 and 1994, with graphs reporting quarterly since 1989.

45. Epidemiology of Ovarian Cancer in Illinois, ERS 96:2 (February 1996)

A review of the epidemiology of ovarian cancer by age; family history; reproductive, hormonal, menstrual, and endocrinologic history; and environmental carcinogens. Mortality as well as incidence data, for Illinois are presented. Characteristics of Illinois women diagnosed with ovarian cancer also are summarized.

In 1994, 247 occupational fatalities occurred in Illinois. Those industries with the greatest number of fatalities included construction, agriculture, and wholesale and retail trade. All these industries, with the exception of wholesale and retail trade, had a higher risk of workplace fatalities relative to their share of the workforce. Transportation incidents were the leading fatal event for men, while the leading fatal event for women was assaults and violent acts.

Incomplete case ascertainment of newly diagnosed cancer of the prostate has been a concern of the population-based, central cancer registry in Illinois. During the early 1990s, and even before in some places, increases of 20 percent and more in the incidence of the disease were observed. This increase was attributed largely to the introduction of diagnostic serum prostate-specific antigen (PSA) assays, which resulted in earlier ascertainment of clinically- occult disease, rather than noting actual changes in the frequency of the disease. This study compares the expected increasing trends in the incidence of prostate cancer among the three facility types to determine whether the increase in federal facilities was greater and might be attributable to more complete casefinding.

Monitors all fatal work injuries, collects information on the circumstances and characteristics of the decedent. This report describes the 249 occupational fatalities that occurred in Illinois in 1995.

50. Lead Poisoning Prevention with States in Collaboration with Local Health Departments: A Model for Intervention Related to Lead Poisoning in Indoor Firing Ranges, ERS 97:2 (January 1997)

The results of the Department’s collaboration with local health departments to develop a model for intervention related to lead poisoning in small businesses.

51. A Case Control Study of Multiple Myeloma in Decatur, Illinois, ERS 97:3 (February 1997)

Discusses results of the case-control study of multiple myeloma to determine whether cases, who were residents of Decatur, Illinois, were more likely to have worked in an industry or occupation whose exposures are associated with the development of multiple myeloma and whether cases were more likely to have been long term residents of the city of Decatur, Illinois.

There are two sections of this report. The first provides descriptive information on county-specific birth defects prevalence rates at birth diagnosed in Illinois newborns from 1989 through
1994. The second examines the mortality experience of Illinois newborn infants diagnosed with birth defects ascertained form a population-based adverse pregnancy outcomes reporting system.

Annual cancer incidence for 1986 to 1994 and cancer mortality for 1986 to 1995 in Illinois are reported for all races, whites, blacks, and Asian/other races by sex. For 1993 and 1994, cancer incidence data on Hispanic males and females are included in the incidence section as are pediatric cancer data for children ages 0 to 19 and ages 0 to 14 for 1986 to 1994.

56. Silica Exposure in Artificial Nail Application Salons, ERS 97:8 (December 1997)

This report describes the results of the Department’s study on the exposure rate for silica in five nail salons in Illinois.

This report assesses the health and financial impact of osteoporosis on populations in Illinois by analysis of hospital discharge records from all acute care hospitals in Illinois from 1992 to 1995.

The Census of Fatal Occupational Injuries monitors all fatal work injuries, collecting information on the circumstances of the injury and characteristics of the decedent. This report describes the 262 occupational fatalities that occurred in Illinois in 1996.

This report describes the results of the Department’s study of the Silicosis in Illinois program that identifies silicosis cases and the attempts to identify the work site source for the exposure. Once the work site is identified, remedial action is attempted to prevent additional silicosis cases.

A report on the registry’s on-going surveillance of elevated blood lead levels in adults, including areas of exposures, companies involved in exposures, and findings of Occupational Safety and Health Administration’s work site investigations.
Reports

Characterizes Illinois as a whole (1950 to 1979) and individual Illinois counties (1970 to 1979); includes geographic analyses of cancer mortality by race, sex and cancer types.

Registry Newsletter

The following reports were published in the Division’s “Registry Newsletter”.

1. Winter 1994

2. Spring 1995

   Census of Fatal Occupational Injuries

3. Summer 1996

   Building and Electronic Reporting Infrastructure

4. Fall 1996

   Highlights from the 1995 Illinois Census of Fatal Occupational Injuries

5. Winter 1996

   News from the Registries
7. Summer 1997

Caught In or Crushed In Collapsing Materials, CFOI, Illinois, 1992-1995
ISCR, “Class 3” Case Evaluation Study Report

8. Fall 1997

Thyroid Cancer and Exposure From Nuclear Testing Fallout in Illinois
Decline in APORS Reporting Since 1994

Projected Cancer Incidence for the State
Forklift Fatalities in Illinois

10. Spring 1998

Annual Report

Epidemiologic Studies - Fiscal Year 96 Annual Report
Epidemiologic Studies - Fiscal Year 97 Annual Report

Contact: Division of Epidemiologic Studies

TTY (for hearing impaired use only) 800-547-0466
DIVISION OF VITAL RECORDS

1. Funeral Director's Handbook

   Technical aspects of the funeral director's duties in registering deaths and fetal deaths; a resource for students of mortuary science and for funeral director apprentices and trainees.

2. Coroner's Handbook

   A guide for coroners that includes medicolegal instructions, the Coroner's Act, the Vital Records Act and methodologies for preparing and filing death certificates.

3. Hospital Handbook

   Provides vital record preparers with instructions necessary to prepare and file certificates of birth and fetal death. Includes excerpts from the Vital Records Act and other relevant statutes, rules and regulations.

4. Birth Application

   Use to order certified copies of birth certificates. An individual's eligibility to receive certified copies, as well as fee information, is included.

5. Death Application

   Use to order certified copies of death certificates. An individual's eligibility to receive certified copies of death certificates, as well as fee information, is included.

6. Commemorative Birth Certificate

   Information about the Illinois Commemorative Birth Certificate. The background design, fee, and an individual's eligibility to receive certified copies are explained in detail.

7. Illinois Adoption Registry "Your Life Doesn't Have to be a Closed Book"

   Provides adoptees and all associated with adoption with an overview of the Illinois Adoption Registry. Lists information regarding counseling services, who may register and how to do so, fees, etc.
8. Manual of Coroner's Pathologists

An informational aid to assist a coroner's pathologist(s). Detailed medicolegal investigative processes are reviewed to acquaint pathologists with the special knowledge required to preserve and collect evidence, conduct preliminary investigations, perform autopsies and determine time of death and nature of injuries. Serves as a resource when pathologists must consult specialists in the areas of pediatric autopsies, aircraft accidents, examination of radioactive cadavers, etc.

9. Directory of Illinois Local Registrars

A list of local registrars throughout the state. Office addresses are given in addition to each registrar's separate jurisdiction. This directory is of particular importance to funeral directors since they occasionally must file death records in other districts.

Contact: Division of Vital Records

DIVISION OF ACCOUNTING SERVICES

1. Indirect Cost Manual

Policies and procedures for indirect cost reimbursements received from the federal government.

2. Property Control Manual

Uniform procedures for property control within the Department.

3. Time Reporting System Instruction Manual

Guidelines for preparing employee program reports. Lists all current time reporting system (TRS) program codes.

Contact: Division of Accounting Services
535 W. Jefferson St., 4th Floor
Springfield, IL 62761
217-782-5934
TTY (for hearing impaired use only) 800-547-0466
STATE/LOCAL LIAISON UNIT

1. Providing Public Health Services Through a Local Health Department

Details the functions and benefits of a local health department with a brief explanation of funding.

2. Certified Local Health Department Code

Rules for certified local health departments, including application requirements, personnel requirements and practice standards.

3. Local Health Department Development Grant Rules

Requirements for administering local health department development grants, which provide local boards of health with financial assistance for establishing and certifying of local health departments.

4. Local Health Protection Grant Rules

Eligibility requirements for the local health protection grant to certified local health departments; includes program standards for infectious diseases, food protection, potable water supply and private sewage protection.

5. Improving the Public Health System - The Road to Better Health for All of Illinois

A report issued by the Roadmap Implementation Task Force in March 1990.

6. The Reengineering of Public Health in Illinois

A report issued by the Local Health Liaison Committee.

Contact: State/Local Liaison Unit
535 W. Jefferson St., 4th Floor
Springfield, IL 62761
217-785-4357
TTY (for hearing impaired use only) 800-547-0466
OFFICE OF HEALTH AND WELLNESS

DIVISION OF HEALTH PROMOTION AND HEALTH EDUCATION

1. Health Education in Local Health Departments (booklet)

   Assists administrators in establishing a health education position in their departments and in using health educators effectively; includes sample job descriptions.

2. The Illinois Strategic Plan for Injury Prevention and Control

   Outlines objectives included in Healthy People 2000; includes information related to magnitude, costs, risk factors and prevention strategies.

Intentional Injuries

1. Partner Abuse in Illinois: Knowing the Facts and Breaking the Cycle (report)

   Looks at partner abuse from a public health viewpoint; discusses the role of health systems in responding to partner abuse; describes the incidence and prevalence of spousal abuse by age group; and identifies causal theories and correlate factors.

Contact: Division of Health Promotion and Health Promotion
535 W. Jefferson St., 2nd Floor
Springfield, IL 62761
217-785-2060
TTY (for hearing impaired use only) 800-547-0466

DIVISION OF CHRONIC DISEASE PREVENTION AND CONTROL

1. Illinois Clean Indoor Air Act Packet

   Details information pertaining to the Illinois Clean Indoor Air Act.

2. Illinois Strategic Plan for Tobacco Control

   Outlines broad objectives and specific strategies for reducing tobacco use; includes information related to magnitude, costs, current use, special populations, resources and research needs.
Alzheimer's Disease

1. Regional Alzheimer's Disease Assistance Center - Southern Illinois University School of Medicine, Springfield (pamphlet)
   Describes available services (e.g., research, educational services, diagnostic protocol and treatment).

2. Rush Alzheimer's Disease Center - Rush-Presbyterian-St. Luke's Medical Center, Chicago (pamphlet)
   Describes available services (e.g., patient evaluations, research, care and family support).

3. Alzheimer's Disease Program (pamphlet)
   Describes the two regional centers, the primary provider site and the Alzheimer's Disease Research Fund.

High Blood Pressure

1. Eat Right to Help Lower Your High Blood Pressure (brochure)
   Explains in easy-to-read (fifth-grade level) large type and illustrations the importance of reducing high blood pressure; list foods high and low in sodium and fat; includes menu ideas and a shopping list to help in developing low sodium and low saturated fat eating.

2. Eat Right to Lower Your High Blood Cholesterol (brochure)
   Explains in easy-to-read (fifth grade level), large type with illustrations the importance of lowering high blood cholesterol; focuses on food choices and preparation; includes charts and menus listing foods high and low in saturated fat and cholesterol.

Sudden Infant Death Syndrome (SIDS)

Booklets
1. Crib Death

Information about SIDS in clear, simple language.

2. About Grief

A scriptographic booklet dealing with grief (published by Channing Bete Co.)

3. Sudden Infant Death Syndrome (SIDS): What Child Care Providers and Other Caregivers Should Know (English, Spanish)

Basic facts about SIDS for caregivers.

4. Healing a Father's Grief

Deals with grief and bereavement for men (published by Medic Publishing Co.)

5. Holiday Help

Dealing with grief and bereavement during holidays (published by Accord Inc.)

6. Thumpy's Story: A Story of Love and Grief Shared (English, Spanish)

For young children; written in story form as an aid to understanding death and grief (published by Paririe Lark Press)

7. Where's Jess?

A simple story with pictures for very young children; used as an aid to understanding death and grief (published by Human Services Press)

Brochures

1. Children and Death

Helping children handle grief (published by Human Services Press)

2. What Happens When Someone Dies?

A guide for young people in coping with death (published by Human Services Press)

3. Back to Sleep Questions and Answers for Professionals on Infant Sleeping Positions and SIDS (published by the U.S. Pubic Health Service) (English, Spanish)
4. Back to Sleep Reduce the Risk of Sudden Infant Death Syndrome SIDS (published by the U.S. Public Health Service) (English, Spanish)

A guide for parents.

Manuals

1. Directory of Illinois Bereavement Support Groups: For Families Who Have Experienced Sudden, Unexpected Infant Death

2. Sudden Infant Death Syndrome: A Manual for Funeral Directors

4. Sudden Infant Death Syndrome: Coroner/Medical Examiner's Manual

5. Sudden Infant Death Syndrome: A Manual for First Responders and Emergency Room Personnel

Hearing Instrument Consumer Protection Program

Brochures

1. A Hearing Aid Can Be A Good SOUND Investment Consumer Notice Sheet (English, Spanish)

Provides the toll-free number for inquiries or complaints about hearing aids. Required to be given by dispensers with each Hearing Aid purchase.

2. A Hearing Aid Can Be A Good Sound Investment If You Purchase Wisely (English, Spanish)

Thirteen tips on purchasing a hearing instrument.

3. Noise, Hearing Loss and You (English, Spanish)

Using charts and diagrams, details hearing, hearing loss and ear protectors.
4. Hearing Aids: Their Use and Care

A consumer guide.

Vision and Hearing

Booklets

1. Vision and Hearing Annual Report

Statewide statistical summary results compiled from childrens’ vision and hearing screening programs.

2. Vision Screening Guide

Reference resource to assist school administrators in coordinating required vision screening programs.

Brochures

1. Preschool Vision and Hearing Screening (English, Spanish)

Vision and hearing readiness games to be used with children at school and home to help prepare the child for screening.

2. Sights and Sounds (English, Spanish)

Informs parents of the importance of vision and hearing screening.

3. Serous Otitis Media and the Myringotomy Operation

Details for the consumer on serous otitis media, how it is treated and the results.

4. Farm Health and Safety

Farm accident prevention tips relating to eyes, ears and respiratory systems.

Illinois Emergency Medical Services for Children Pediatric Resources

1. Illinois EMSC Needs Assessment Report

   The pediatric component of the Illinois EMS system conducted during 1994-1995. Provides information on the integration of pediatric care in the following areas: prehospital, emergency department, inpatient, rehabilitation and schools. Assessment information is provided on poison control centers, the 911 system and E-coding within Illinois.

2. Position Statement on Pediatric Prehospital Protocols

   Identifies key components which pediatric specific prehospital protocols should contain.

3. Illinois EMSC ALS, ILS and BLS Pediatric Prehospital Protocol Guidelines

   In an algorithm format, Illinois recommended care guidelines for the ALS, ILS, and BLS prehospital provider. Addresses the following:

   - Pediatric Initial Assessment  - Pediatric Tachycardia (Wide and Narrow Complex)
   - Pediatric Bradycardia      - Pediatric Tracheostomy with Respiratory Distress
   - Pediatric Cardiac Arrest   - Pediatric Allergic Reaction/Anaphylaxis
   - Neonatal Resuscitation    - Pediatric Altered Level of Consciousness
   - Pediatric Respiratory Arrest - Pediatric Toxic Exposures/Ingestions
   - Pediatric Respiratory Distress - Pediatric Environmental Hyperthermia
   - Pediatric Shock            - Pediatric Burns (Thermal/Electrical/Chemical)
   - Pediatric Seizures         - Pediatric Trauma (with Head Trauma Addendum)
   - Pediatric Hypothermia      - Suspected Child Abuse and Neglect
   - Pediatric Near Drowning

4. Pediatric Educational Recommendations for Professional Healthcare Providers

-49-
Emphasizes the need for ongoing pediatric focused education for health care professionals who have contact with children. Several national and Illinois specific pediatric curricula are recommended and curricular content is summarized.

5. Prehospital equipment Recommendations

ALS and BLS pediatric prehospital equipment recommendations.

6. Interfacility Pediatric Trauma and Critical Care Consultation and/or Transfer Guideline

Assists decision making on when to seek consultation or to transfer pediatric patients based on patient criteria, local needs and resources.

7. Illinois EMSC Emergency Departments Equipment Lists for Standby, Basic and Comprehensive Emergency Departments

Details pediatric equipment recommendations for each of the recognized types of emergency departments within Illinois.

Curricular Programs

1. Accidents Aren’t Program

Identifies EMTs and other emergency care professionals as the critical link in injury control. Provides core information to emergency care personnel regarding injury as a disease process, the effects of injury on society and the need for EMS to become involved in injury prevention/public education activities (includes a slide set).

2. Adopt-A-School Program

Encourages EMTs to partner with local schools and provide injury prevention information. Aimed at the elementary school age child, includes modules on bicycle, water, fire safety and appropriately accessing the EMS system (includes overheads).

3. Community Awareness and Resource Education Program

Provides childhood injury prevention information to parents. Includes safety information related to the following areas: motor vehicles, pedestrian, bicycle, fire/burn, water, playground, poisonings, suffocation/aspiration, falls, firearms, winter sports, farm safety, how to kid proof your home, immunization, suicide and violence prevention.
4. Children with Special Health Care Needs

Addresses the training needs of EMTs and emergency care personnel concerning children with special health care needs (CSHCN)/technology assisted children. Provides core assessment and management information on treating this pediatric population.

5. School Nurse Emergency Care Course

Designed to enhance the assessment and appropriate triaging skills of the school nurse when confronted with the acutely ill or injured child. With the increasing number of urgent health related conditions seen within the changing school environment, this course will support the school nurse’s core knowledge base in responding to these situations.

In addition, access to the Illinois EMSC web site provides further information regarding the EMSC program and offers links to related pediatric web sites including sites that host interactive pediatric educational opportunities.

The Illinois EMSC web site can be accessed through the following steps:

1. Open the URL http://www.lumc.edu
2. Choose the “Department Home Pages” link
3. Choose the “Emergency Medical Services for Children” link

DIVISION OF HEALTH CARE FACILITIES AND PROGRAMS

Directories

1. Ambulatory Surgical Treatment Centers Directory

Lists the name, address, telephone number, administrator's name and facility identification number for the state's licensed and Medicare-certified ambulatory surgical treatment centers.

2. End-stage Renal Disease Facilities Directory

Lists the name, address, telephone number, Medicare provider number and approved number of dialysis stations for the state's freestanding, Medicare-certified kidney dialysis facilities.
3. Certified Health Maintenance Organizations Directory

Lists the name, address, telephone number, state and federal status, type of ownership, contract types, administrator's name and service area for the state's licensed and Medicare-certified health maintenance organizations.

4. Home Health Agency Directory

Lists the name, address of the agency, telephone number, license and Medicare identification numbers, ownership type and licensed services provided for the state's licensed and Medicare-certified home health agencies.

5. Hospice Directory

Lists the name, address of the provider, telephone number, license and Medicare identification numbers, program type, licensed services provided and administrator's name for the state's licensed and Medicare-certified hospice programs.

6. Hospital Directory

Lists the name of the hospital, address, telephone number, facility identification number, administrator's name and hospital type.

7. Medicare-certified Programs and Health Facilities and Institutions

A list of occupational and physical therapists both in independent practice and in the following types of programs: outpatient physical therapy, speech pathology and occupational therapy services; portable X-ray services; comprehensive outpatient rehabilitation facilities; rural health clinics; and Medicare-certified community mental health centers. Each listing includes the name of the service or facility, address, telephone number, Medicare number (where applicable), approved services and administrator's name.
