NOTICE OF ADOPTED AMENDMENTS

- 1) Heading of the Part: Control of Communicable Diseases Code
- 2) Code Citation: 77 Ill. Adm. Code 690
- 3)

<u>Section Numbers:</u>	<u>Adopted Actions:</u>
690.30	Amendment
690.100	Amendment
690.110	Amendment
690.335	New Section
- 4) Statutory Authority: Communicable Disease Report Act [745 ILCS 45] and the Department of Public Health Act [20 ILCS 2305]
- 5) Effective Date of Amendments:
- 6) Does this rulemaking contain an automatic repeal date? No
- 7) Does this rulemaking contain incorporations by reference? No
- 8) A copy of the adopted amendments, including any material incorporated by reference, is on file in the agency's principal office and is available for public inspection.
- 9) Notice of Proposed Amendments Published in Illinois Register: 40 Ill. Reg. 1484; January 22, 2016
- 10) Has JCAR issued a State of Objection to these amendments? No
- 11) Difference(s) between proposal and final version: None, no changes were made as a result of public comment or in response to JCAR.
- 12) Have all the changes agreed upon by the agency and JCAR been made as indicated in the agreements issued by JCAR? Yes
- 13) Will this rulemaking replace an emergency rule currently in effect? No
- 14) Are there any amendments pending on this Part? No
- 15) Summary and Purpose of Rulemaking: This rulemaking reinstitutes the reporting of *Campylobacter* to the Department of Public Health. The amendments add the method of reporting, time within which to report, case control methods and laboratory reporting

ILLINOIS REGISTER

DEPARTMENT OF PUBLIC HEALTH

NOTICE OF ADOPTED AMENDMENTS

requirements. The addition of the reporting of *Campylobacter* will aid the Department in the detection of cases, clusters and outbreaks of campylobacteriosis in Illinois.

- 16) Information and questions regarding these adopted amendments shall be directed to:

Elizabeth Paton
Assistant General Counsel
Division of Legal Services
Illinois Department of Public Health
535 W. Jefferson St., 5th floor
Springfield, Illinois 62761

217/782-2043
e-mail: dph.rules@illinois.gov

SUBPART A: GENERAL PROVISIONS

Section 690.30 General Procedures for the Control of Communicable Diseases

This Section establishes routine measures for the control of communicable diseases by the Department or local health authorities and health care providers, and establishes progressive initiatives to ensure that disease-appropriate measures are implemented to control the spread of communicable diseases. These procedures are intended for use in homes and similar situations. This Section does not apply to sexually transmissible infections, which are regulated under the Control of Sexually Transmissible Infections Code.

a) Investigation

- 1) *The Department of Public Health shall investigate the causes of contagious, or dangerously contagious, or infectious diseases, especially when existing in epidemic form, and take means to restrict and suppress the same, and whenever such disease becomes, or threatens to become, epidemic in any locality and the local board of health or local authorities neglect or refuse to enforce efficient measures for its restriction or suppression or to act with sufficient promptness or efficiency, or whenever the local board of health or local authorities neglect or refuse to promptly enforce efficient measures for the restriction or suppression of*

ILLINOIS REGISTER

DEPARTMENT OF PUBLIC HEALTH

NOTICE OF ADOPTED AMENDMENTS

dangerously contagious or infectious diseases, the Department of Public Health may enforce such measures as it deems necessary to protect the public health, and all necessary expenses so incurred shall be paid by the locality for which services are rendered. (Section 2(a) of the Act)

- 2) Each case or cluster of a reportable communicable disease shall be investigated to determine the source, where feasible. Findings of the investigation shall be reported as specified under the Section of this Part applicable to each specific disease.
- 3) The Department or local health authority may investigate the occurrence of cases, suspect cases, or carriers of reportable diseases or unusual disease occurrences in a public or private place for the purposes of verifying the existence of disease; ascertaining the source of the disease-causing agent; identifying unreported cases; locating and evaluating contacts of cases and suspect cases; identifying those at risk of disease; determining necessary control measures, including isolation and quarantine; and informing the public if necessary.
- 4) When the Director determines that a certain disease or condition that is known or suspected to be communicable or infectious warrants study, the Director may declare the disease or condition to be the subject of a medical investigation and require hospitals, physicians, health care facilities, etc., to submit information, data and reports, and allow review and examination of medical records as necessary for the purpose of the specific study. No practitioner or person shall be liable in any action at law for permitting examination and review. The data obtained shall be held confidential in accordance with the Communicable Disease Report Act.
- 5) When two or more cases of a suspected or reportable infectious disease occur in any business, organization, institution, health care facility or private home, the business owner, the person in charge of the establishment, or the homeowner shall cooperate with public health authorities in the investigation of cases, suspect cases, outbreaks and suspect outbreaks. This includes, but is not limited to, release of food preparation methods; menus; lists of customers, attendees, residents or patients; environmental specimens; food specimens; clinical specimens; and the name and other pertinent information about employees, guests, members or residents diagnosed with a communicable disease as the

ILLINOIS REGISTER

DEPARTMENT OF PUBLIC HEALTH

NOTICE OF ADOPTED AMENDMENTS

information relates to an infectious disease investigation. When outbreaks of infectious disease occur in any business, organization, institution, health care facility or private home, employees of the location under investigation may be considered to be contacts to cases and be required to submit release specimens by the local health authority.

- 6) When two or more cases of a reportable communicable disease occur in association with a common source, the investigation should include a search for additional cases.
- 7) The Department may conduct sentinel surveillance for an infectious disease or syndrome, other than those diseases or syndromes for which general reporting is required under this Part, if the Department determines that sentinel surveillance will provide adequate data for the purpose of preventing or controlling disease or achieving other significant public health purposes in a defined geographic area or the entire State. The Department shall select, after consultation with the sites, sentinel surveillance sites that have epidemiological significance for the disease or syndrome under investigation. A disease or syndrome may be removed from sentinel surveillance if the Department determines that the surveillance is no longer necessary. The Department shall provide a description, in writing, to sentinel surveillance sites of a specific, planned mechanism for surveillance of the disease or syndrome and, as necessary, submission of clinical materials from cases and suspect cases.
- 8) An individual or entity, including a health information exchange, may carry out activities such as sentinel surveillance under a grant, contract or cooperative agreement with the Department. The authorized individual or entity functions as a public health authority for the purposes of the activity.
- 9) Investigations of outbreaks shall be summarized in a final report and submitted to the Department. The most current summary form shall be used, and a narrative report may also be requested.
- 10) Syndromic Data Collection
 - A) *The Department, in order to prevent and control disease, injury or disability among citizens of the State, may develop and implement, in consultation with local public health authorities, a statewide*

ILLINOIS REGISTER

DEPARTMENT OF PUBLIC HEALTH

NOTICE OF ADOPTED AMENDMENTS

system for syndromic data collection through access to interoperable networks, health information exchanges and databases. The Department may also develop a system for the reporting of comprehensive, integrated data to identify and address unusual occurrences of disease symptoms and other medical complexes affecting the public's health.

- B) *The Department may enter into contracts or agreements with individuals, corporations, hospitals, universities, not-for-profit corporations, governmental entities, health information exchanges, or other organizations, under which those individuals or entities agree to provide assistance in the compilation of the syndromic data collection and reporting system.*
 - C) *The Department shall not release any syndromic data or information obtained pursuant to this subsection (a)(10) to any individuals or entities for purposes other than the protection of the public health. All access to data by the Department, reports made to the Department, the identity of, or facts that would tend to lead to the identity of the individual who is the subject of the report, and the identity of, or facts that would tend to lead to the identity of, the author of the report shall be strictly confidential, are not subject to inspection or dissemination, and shall be used only for public health purposes by the Department, local public health authorities, or the Centers for Disease Control and Prevention. Entities or individuals submitting reports or providing access to the Department shall not be held liable for the release of information or confidential data to the Department in accordance with this subsection (a)(10). (Section 2(i)(A) through (C) of the Act)*
- 11) Investigations conducted by the Department or local health authority may include, but are not limited to:
- A) Review of pertinent, relevant medical records by authorized personnel, if necessary to confirm the diagnosis; investigation of causes; identification of other cases related to the outbreak or the reported dangerously contagious or infectious disease in a region, community, or workplace; to conduct epidemiologic studies; to determine whether a patient with a reportable dangerously contagious or infectious disease has received adequate treatment to

ILLINOIS REGISTER

DEPARTMENT OF PUBLIC HEALTH

NOTICE OF ADOPTED AMENDMENTS

render the patient non-infectious or whether a person exposed to a case has received prophylaxis, if appropriate. Review of records may occur without patient consent and shall be conducted at times and with such notice as is possible under the circumstances;

- B) Performing interviews with the case, or persons knowledgeable about the case, and collecting pertinent and relevant information about the causes of or risk factors for the reportable condition;
- C) Medical examination and testing of persons, with their explicit consent;
- D) Obtaining, from public or private businesses or institutions, the identities of and locating information about persons, travelers, passengers or transportation crews with a similar or common potential exposure to the infectious agent as a reported case; exposure may be current or have occurred in the past;
- E) Interviewing or administering questionnaire surveys confidentially to any resident of any community, or any agent, owner, operator, employer, employee, or client of a public or private business or institution, who is epidemiologically associated either with the outbreak or with the reported dangerously contagious or infectious disease case or has had a similar exposure as a reported case;
- F) Collecting environmental samples of substances or measurements of physical agents that may be related to the cause of an outbreak or reportable dangerously contagious or infectious disease;
- G) Taking photographs related to the purpose of the investigation. If the photographs are taken in a business, the employer shall have the opportunity to review the photographs taken or obtained for the purpose of identifying those that contain or might reveal a trade secret; and
- H) Entering a place of employment for the purpose of conducting investigations of those processes, conditions, structures, machines, apparatus, devices, equipment, records, and materials within the place of employment that are relevant, pertinent, and necessary to the investigation of the outbreak or reportable dangerously

ILLINOIS REGISTER

DEPARTMENT OF PUBLIC HEALTH

NOTICE OF ADOPTED AMENDMENTS

contagious or infectious disease. Investigations shall be conducted during regular business hours, if possible, and with as much notice as possible under the circumstances.

b) Control of Food Products

Whenever a case, a carrier, or a suspect case or carrier of the following diseases exists in a home or establishment where food is produced that is likely to be consumed raw or handled after pasteurization and before final packaging, the sale, exchange, removal or distribution of the food items from the home or establishment may be prohibited by the Department or the local health authority as necessary to prevent the transmission of communicable diseases.

- 14) Typhoid fever
- 15) Yersiniosis
- c) Schools, Child Care Facilities, and Colleges/Universities
 - 1) Except in an emergency, the occurrence of a case of a communicable disease in a school, child care facility or college/university should not be considered a reason for closing the school, facility or college/university.
 - 2) Persons suspected of being infected with a reportable infectious disease for which isolation is required, or persons with diarrhea or vomiting believed to be infectious in nature, shall be refused admittance to the school or child care facility while acute symptoms are present.
 - 3) School, child care facility, and college/university authorities shall handle contacts of infectious disease cases as prescribed in this Part, or as recommended by the local health authority.
 - 4) When outbreaks of disease occur in any child care facility, staff and attendees of the facility may be considered to be contacts to cases and may be required by the local health authority to submit specimens for testing.
- d) Release of Specimens
 - 1) Whenever this Part requires the submission of laboratory specimens for release from imposed restrictions, the results of the examinations will not be accepted unless the specimens have been examined in the Department's laboratory or an acceptable laboratory. The number of specimens needed for release, as detailed under specific diseases, is the minimum and may be increased by the Department as necessary. Improper storage or transportation of a specimen or inadequate growth of the culture suggestive of recent antibiotic usage can result in disapproval of the submitted specimen by the Department's laboratory or an acceptable laboratory and result in the need for an additional specimen to be collected.

- 2) The local health authority may require testing of food handlers for specific pathogens, including, but not limited to, Norovirus, as necessary in response to an outbreak.
- e) Persons with diarrhea or vomiting of infectious or unknown cause shall not work in sensitive occupations or as food handlers until 48 hours after diarrhea and vomiting have resolved and shall adhere to restrictions specified in this Part specific to each etiologic agent.
- f) Persons with draining skin lesions shall not work as food handlers unless the drainage is contained by a dressing and lesions are not on the hands or forearms.

SUBPART B: REPORTABLE DISEASES AND CONDITIONS

Section 690.100 Diseases and Conditions

The following diseases and conditions are declared to be contagious, infectious or communicable and may be dangerous to the public health. Each suspected or diagnosed case shall be reported to the local health authority, which shall subsequently report each case to the Department. The method of reporting shall be as described in the individual Section for the reportable disease.

- a) Class I(a)
The following diseases shall be reported immediately (within three hours) by telephone, upon initial clinical suspicion of the disease, to the local health authority, which shall then report to the Department immediately (within three hours). This interval applies to primary reporters identified in Section 690.200(a)(1) who are required to report to local health authorities and to local health authorities that are required to report to the Department. The Section number associated with each of the listed diseases indicates the Section under which the diseases are reportable. Laboratory specimens of agents required to be submitted under Subpart D shall be submitted within 24 hours to the Department laboratory.
 - 1) Any unusual case of a disease or condition caused by an infectious agent not listed in this Part that is of urgent public health significance 690.295
 - 2) Anthrax* 690.320
